## Table of Organization Annual Reorganization 2022

### Background

Franklin County Public Health (FCPH) senior staff conduct a review each year of the table of organization as a continued effort to align with the 2019 FCPH Strategic Plan, division-level workplans, and core public health foundational capabilities. This year, leadership specifically aligned with updated workplans (2022) and the COVID-19 After-Action Report (2022). These changes also support appropriate managerial staff ratios and program expectations positioning FCPH to be as responsive as possible to current and future public health priorities and emergencies. Changes are outlined by division and office/section. Funding for these new positions will be explored through state and federal grants as well as local governmental funding requests.
